

# Tonistry PxW WeanBetter The Quickstart Guide

**Tonistry PxW WeanBetter is a water-soluble solution for weaned or fattening pigs, to be used as part of the Tonistry Total Programme.**

**This product is easy-to-use and can be distributed via a Mediator Pump, or directly in the Water Supply System**

**IMPORTANT** Prior to arrival of the piglets, make sure to run Tonistry PxW through the water lines until the pink colour is visible in the drinker bowls, so they can consume the PxW solution immediately.

Tonistry PxW should not be used in the farrowing house. Use Tonistry Px instead.

## Mediator Pump (3-Day Protocol)

### Day 1 → Full dose:

Mix 1kg of PxW in 4L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.2% or 2kg in 1,000L)

### Day 2 → Half dose:

Mix 0.5kg of PxW in 4.5L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.1% or 1kg in 1,000L)

### Day 3 → Quarter dose:

Mix 0.25kg of PxW in 4.75L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.05% or 0.5kg in 1,000L)

## Mediator Pump (5-Day Protocol)

### Day 1 → Full dose:

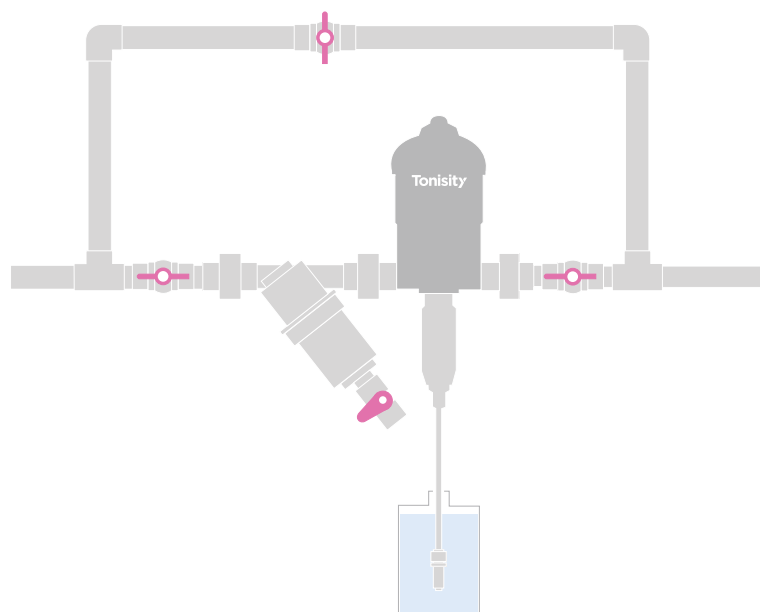

Mix 1kg of PxW in 4L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.2% or 2kg in 1,000L)

### Day 2 & 3 → Half dose:

Mix 0.5kg of PxW in 4.5L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.1% or 1kg in 1,000L)

### Day 4 & 5 → Quarter dose:

Mix 0.25kg of PxW in 4.75L of water, to prepare 5L of stock solution - dilute at 1:100  
(final solution = 0.05% or 0.5kg in 1,000L)

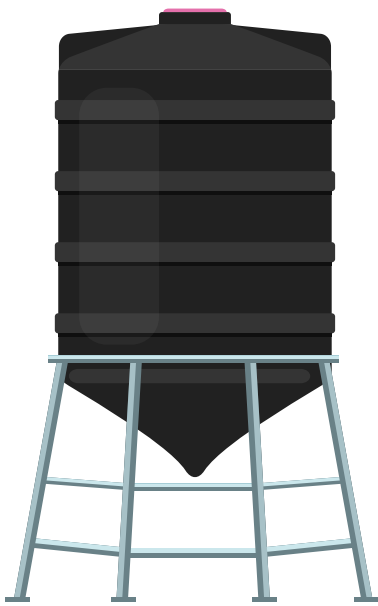

The concentrated solution of Tonistry PxW should be delivered through the water lines using an automatic dosing system, with the dilution rate set at 1 part of concentrated Tonistry PxW to 100 parts water (1:100). 10L of concentrate supplies 850-1000 weaners for a day.

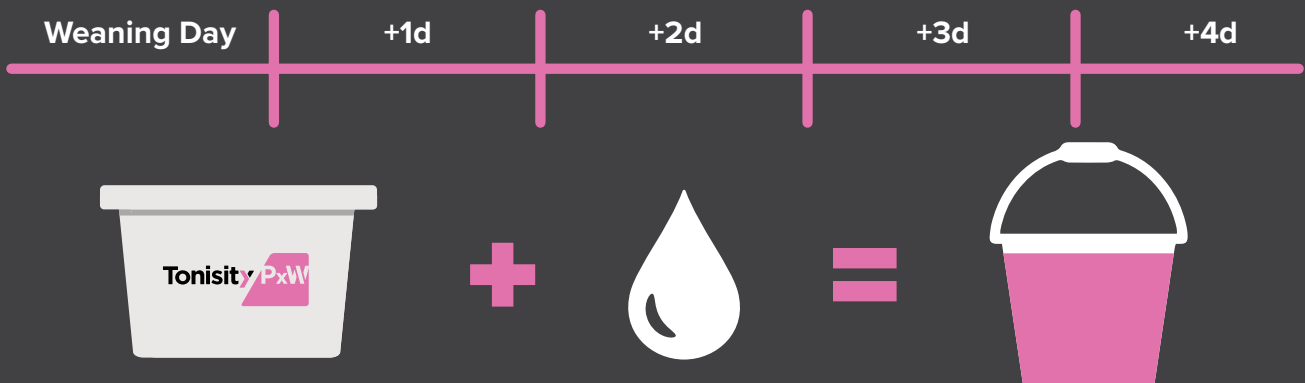

# Tonistry PxW WeanBetter The Quickstart Guide

- ✓ Improve water intake
- ✓ Improve feed intake
- ✓ Achieve heavier pigs

## Water Supply System

- 1kg in 500L water → 0.2% solution (Mix in small bucket first to dissolve!)
- Add 1kg of PxW powder to at least 5L of water in any suitable container
- Mix well until dissolved
- Add that mixture to a 500L water supply. 500L of treated water will supply 400-500 weaners for a day
- For larger water supplies, work in multiples of 500L
- For a three-day protocol use a full dose on day one, half dose on day two and a quarter dose on day three
- For a five-day protocol use a full dose on day one, half dose on days two and three and a quarter dose on days four and five

Add Tonistry PxW solution to the water lines

Tonistry PxW Weanbetter is a follow-on solution for weaned pigs that were originally on Tonistry Px in the farrowing stage.
